To avoid accidents, once assembled place a **DO NOT SIT** sign on each module.

Arming seating modules

Slipcovers are used only in selected modules
1. Arm each box separately as per instructions. On selected models, remember to insert the reinforcement cross inside.
2. Boxes may be closed using short stripes of transparent tape.
3. Group boxes together following module assembly specifications below. You may use stripes of tape to join them together.
4. If the module requires a slipcover, carefully fit it over the boxes once grouped together.
5. Once assembled and fitted, place a Do Not Sit sign **on each** seating module and secure it with a strip of tape.

The Printed Panel

Place tape strips on back of printed panel as indicated by pink marks

Attaching a printed panel to a box:
You have been provided with a set of 6 double sided tape strips to adhere the panel to the box. These strips must be placed on the panel and not on the box, following scheme. Positioning strips in this way will avoid damaging the panel or the other pieces once you disassemble the module and store it for new use. Be extra careful when removing the panel, use a flat knife or similar and avoid pulling up and bending the angles.
Multiple Cabinets
For safety and stability, attach boxes together using small pieces of regular transparent tape.

Do not stack more than 2 units vertically.
